

LIQUIDS IN BAGS?

THE KEY IS IN THE DISPENSING!

For packaging liquid products, nothing is as efficient as the form/fill/seal process. The packaging material is inexpensive. As is the process. Combine that with the available dispensing technology, and you have the best of all possible worlds.

And for the best of all packaging equipment, look no further than General. We have over 20 years of experience in building the most reliable equipment for packaging liquids in bags with dispensing devices.

FITMENTS FOR ANY BAG AND ANY VISCOSITY

- Sauces
- Creams
- Wine
- Syrups
- Toppings
- Soaps

- Condiments
- Juices
- Water
- Waxes
- Lubricants

And many other products

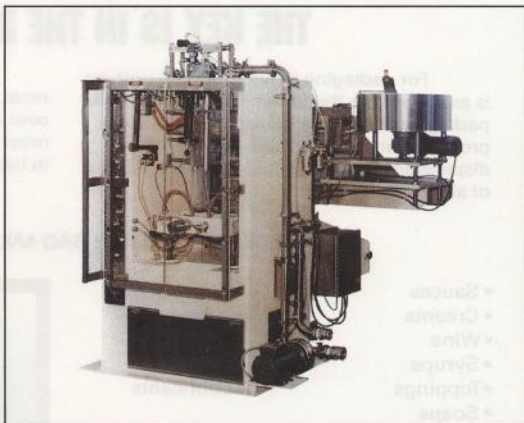

**GENERAL PACKAGING
EQUIPMENT CO.**

Since 1954, we've built reliable packaging systems for companies all over the world. Our machines have a reputation for long term dependability, running 1, 2, or 3 shifts year after year. And that durability comes with low maintenance costs. We also have parts and updating kits for older machines. We offer:

- 40-plus years of VFFS packaging experience
- Installation and field service
- Qualified technicians
- In-house research and development
- Fully-staffed engineering and manufacturing departments
- Large parts inventory with 24-hour shipping of stocked parts
- Training for operating and maintenance personnel

Model 48WLCF equipped with fitment applicator and pump inserting for 2 different pump designs.

Model 70LCM equipped with screw cap applicator. This is a military version for in-field use.

SIZE CAPACITIES
